

Black Fiveday 2018 Performance Analysis

Uptime

Page Load Time

How did we do it?

This is a summary of Uptime and Latency performance results between November 22nd-26th, 2018 as measured by an independent third-party vendor. They measured performance of UGC Gallery integrations for [Curalate Fanreel](#) and similar products from several competitors.

How did Curalate perform?

Curalate had a faster page load time than all competitors and exhibited a much tighter range in page load time, ensuring a consistent, quality user experience. In fact, Curalate was as responsive and dynamic as ever: our APIs served ~400 million content impressions as we maintained perfect uptime and consistent low latency.

See how better performance can help your business grow.
